Description

The application Library management software is being crashed when the user is adding the two books in the book category . And the application as an issue when the user is renew the book which the user is already taken is not showing in the application already issued by the library management .

“Steps to reproduce”

1. Open the Library management application.

2. Navigate to the search form on the top right corner.

3. Select the book one.

4. Select the book two.

5. Then add both to the book category.

6. Observe the result.

Expected result: After selecting the books user should successfully add the books to the system and redirected to the homepage.

Actual result: After adding two books application is being crashed .
